

KX06

For your biggest adventures

Blatchford

**KX06 is designed
to take you on your
biggest adventures.**

Built to withstand the most demanding activities and challenging environments, KX06 lets you take on everything from everyday living to the great outdoors.

Resilient and robust, KX06 provides the high activity user with a rugged and waterproof solution that combines outstanding stability with smooth and predictable operation.

Introducing the

NEW K

X06

All-terrain stability

At heel strike, KX06's design offers excellent geometric stability, reducing the risk of accidental release on varied terrain, while retaining easy initiation of flexion. The polycentric design shortens the limb length during swing, improving ground clearance and helping prevent falls. The inherent characteristics of the hydraulic controls allow the knee to naturally adapt to your speed, providing a smooth and predictable experience and security on slopes and stairs.

Robust design

The updated design of KX06 is sleeker, tougher and shorter in build height. The aluminium frame, with its strengthened bearings makes KX06 even more robust, and able to support a 150kg wearer. The self-aligning bearing system protects the cylinder from side loads, increasing the durability of the knee.

Comfort and style

The silicone cover provides a clean look, as well as protecting the knee. The large 160 degree flexion angle makes it easier to move your leg in confined spaces, such as in the car, or under a table.

Multiple user modes

KX06 provides the opportunity to switch from normal operation to either free-swinging cycling mode, or a flexion lock. The flexion lock, when engaged, locks the knee on flat or sloped terrain, allowing more even loading and improving stability and posture by relieving pressure on the user's sound limb and lower back.

Easy to maintain

KX06 can cope with challenging environments, from water to dirt and sand. Don't worry about that muddy bike ride – just rinse with fresh water and dry!

Perfectly matched with...

Blade^{XT} and Elite Blade

Blade^{XT} and Elite Blade provide lightweight and dynamic solutions for more active users.

Hydraulic Ankles

Blatchford Hydraulic Technology provides a smooth, safe and natural walking experience, helping to contribute to your long term health.

Technical Specification

| | |
|-------------------------|-----------------------------|
| Activity Level | 3-4 |
| Max. user weight | 150kg (AL3) and 145kg (AL4) |
| Build Height | 220mm |
| Weight | 1.34kg (excluding cover) |
| Knee Flexion | 160° |
| Warranty | 36 months |

Ordering Information
